

Welcome To The Beta Program

From The Desk Of Mike Antoni

I'm so glad you joined the beta program. This short document takes you through the steps of getting started with your Income Infuser 3.0 software.

First, you should be glad to know that you have a fully functional marketing system right at your fingertips. This system cost us over \$30,000 and a full year of our time to develop. And you got it for free as a beta tester. All you need to do is to get it setup and then report any bugs you may find. However, we believe you will find it bug free. ☺

There are 3 steps you have to take, but they are fast and easy. **These 3 steps are VITAL to your participation in the FREE Beta program.** So, please read this whole document very carefully. (I have marked the 3 steps in **BIG RED LETTERS** ;)

Your new Income Infuser Software can be installed and fully functional in about 10 minutes or less. And yes, you don't have to do anything technical at all.

This document is just to walk you through your steps to get started.

You should have gotten an email from me (Mike Antoni) and Rick Anthony. In those emails you should have gotten access to your Income Infuser members back office.

Here's the link to your members area login:

<http://Click4Access.com/ii>

Step 1: Sign Up For The Welcome & Orientation Webinar

Don't wait a single second. Click this link right now and register for this webinar. This is vital to your success and a requirement of the beta program. This webinar and future webinar trainings are included free as a beta member.

Go Register Now: <http://www.click2webinar.com/ii/training/>

On this webinar we'll show you through your complete back office and you'll see everything you have available to help you succeed with this program.

Just know that we are here for you 100% of the way and will do everything we can to help you... As a beta member, there are just a few other things you need to be aware of and on the next few pages I will explain everything and give you the steps you need to take...

As A Beta Member, You Will Need To Get Your Income Infuser 3.0 Software Setup

Now, as we said, we can and will do the install for you. But in order for us to do the install for you for FREE, you need to follow the exact steps as outlined below.

To set your new site up, there are only a few things you need.

1) A Domain name

2) Hosting

We explain this in your members' area, but I'll go over it again here in this document.

Step 2: Choosing Your Domain Name

Your domain name is how people find you online. When you want to show off your new business to friends and family you will tell them to check out www.MYSITE.com

Of course, MYSTITE.com will be whatever your domain name will be. When it comes to choosing a domain name, here are a few tips:

A. On the first page of your new website, you are giving away a video series called the Fast Cash Video Series.

Discover a proven simple step-by-step video system for making money online as fast as 24 hours from now by leveraging this innovative system for getting fast money in your pockets.

Read on to learn how this video series can help you generate more income this year and beyond!

*Enter your name and email
for FREE Instant Access*

This Fast Cash Video Series Covers...

So, it's a good idea to pick a domain name around that title. Some examples (may already be taken but to get you started on your search) are:

FreeFastCashVideos.com SuperFastCashVideos.com MyFastCashVideos.com

YourFastCashVideos.com TheFastCashVideoSystem.com QuickCashVideos.com

Basically, you'll want to play around with the words free, fast, video, cash, your, my, quick, money, system, process, get, go, now, etc. And with just those few words that are literally thousands of domain options.

You will need to buy your own domain name. They sell for \$7.49 through Godaddy.com. Login to your member's area and click on "Start Here" for complete instructions.

Step 3: Choosing Your Hosting Account

I know some people have been "waiting for the other shoe to drop" so to speak with the beta program. And if there's any "catch" to this whole thing, this step is it. But believe me when I say this step is necessary for ANY REAL ONLINE BUSINESS. There's no way around this one.

In order to have a website online, you have to have hosting. Hosting is sort of like paying rent for an apartment. If you want to stay in your apartment, you've got to pay for that space. Hosting is like having an online apartment. You are paying for your website to "live online".

Now, before you freak out and think this is some crazy expense, don't worry... it's not. As a matter of fact, we went out and teamed up with an awesome hosting company to make this process really affordable and easy for you.

Introducing iSpyHost.com

iSpyHost is our partner hosting company. Your next step after choosing your domain name is to sign-up for hosting. This step is really easy. And here's the best part. Once you sign up for iSpyHost our tech team goes to work INSTANTLY to install your site.

We keep our techs going 24/7 to get you installed the second you create your iSpy account. And the best part is we take care of installing your site for you... for FREE.

We did this because we want to clear away the technology hurdle that holds most people back. Plus, the more success stories we get, the better our new 3.0 Infuser will sell. ☺

How Much Is It?

iSpyHost is a low cost of only \$19.95 per month. Compared to other hosting companies, it's as cheap as it gets. *Because with iSpy you can host 10 different sites.* That means you can be **running 10 different businesses all for just \$19.95 per month.** This means you could run 10 online businesses for less than \$2 a piece.

It's important to reiterate, you have to have hosting if you have your own website. And it's vital to your success with this program or whatever you may do online. And because we want to make the decision to host w/ iSpy super easy, **we are giving you a complete site install absolutely FREE when you sign up for hosting.**

This is a REAL \$97 value. And if you've ever struggled with technology or you're not a computer person, this is by far the most affordable and easy way to get started with your own business.

Once you make your payment, your site should be installed within MINUTES. Yes, just minutes. And then you are ready to rock and start making sales. That's how we setup the beta program for you because that is how Income Infuser 3.0 will work when we roll it out.

What If I Already Have Hosting?

Some people already have hosting, and I respect that. However, we are running the beta program to get an accurate look at how Income Infuser 3.0 will work. Basically, we have worked closely with iSpyHost and their programmers to seamlessly integrate our software into their hosting.

So, we want to make sure that process is working before we roll it out to all of our customers. So, we kindly ask that you sign-up for iSpyHost to make this process easier for all of us.

And if you think you get "cheaper" hosting elsewhere, please think about a few things.

- 1) When you host with iSpy you get a FREE install instantly. (\$97 value)
- 2) Other "cheap" hosts give you 1-2 domains or accounts. iSpy gives you 10 accounts.
- 3) As a special beta tester, we will continue to work with you to beta test our newest software products. Over the next year or so we plan on rolling out at least 10 new software businesses. You will get these for FREE as long as you host with iSpy.
- 4) Cheap hosts don't offer the databases and other requirements needed to properly run Income Infuser... you usually have to upgrade to the \$20+ per month package anyway.

Here Are The Steps For Signing Up For Your Domain And Hosting Account

1) Sign-In To <http://Click4Access.com/ii> with your email address and password.

Please Login To Continue

Email

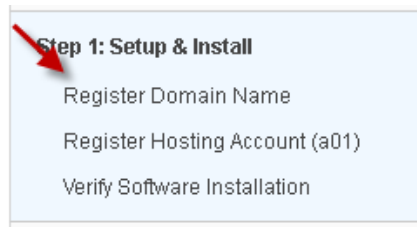

Password

Remember me (for 2 weeks)

2) Click On The “Start Here” Tab.
